

0130405

This book is an INDEX to published and unpublished marriage records.

Compiled as follows:

Year of Marriage	Surname Indexed	Given Name	To Whom Married	Where Married
1676	ABBOT	Mary &	Jn Hibbert	Morley.

Thus, Mary Abbot and John Hibbert were married at Morley,  
Derbyshire, England, in 1676.

-- Derby 12, Vol. 5, p. 1.

The common spelling of the surname is placed in capital letters at the beginning of all entries pertaining to that name, and only the variation in spelling is given thereafter; otherwise the surname is not repeated.

In making the Index most given names were abbreviated. When copying entries from it, write all given names in full.

In some cases, names of males are indexed in separate volumes from those of females for the same period of years. Consult both the index to males and to females.

PATRONS ARE CAUTIONED to look up the more complete entry in the printed marriage record of the parish mentioned, whenever such marriage is available in the Library.

Thus in Boyd's Marriage Index for Somerset appears this entry:  
"1598 TROTT Agn & Jno Aplin Pitminster"

By referring to the printed marriages for Pitminster, Somerset, we find the entry in full, as follows:

"John Aplin, s. of Richard Aplin, & Agnes Trott, d. of Robert Trott, md. 26 Aug. 1598."

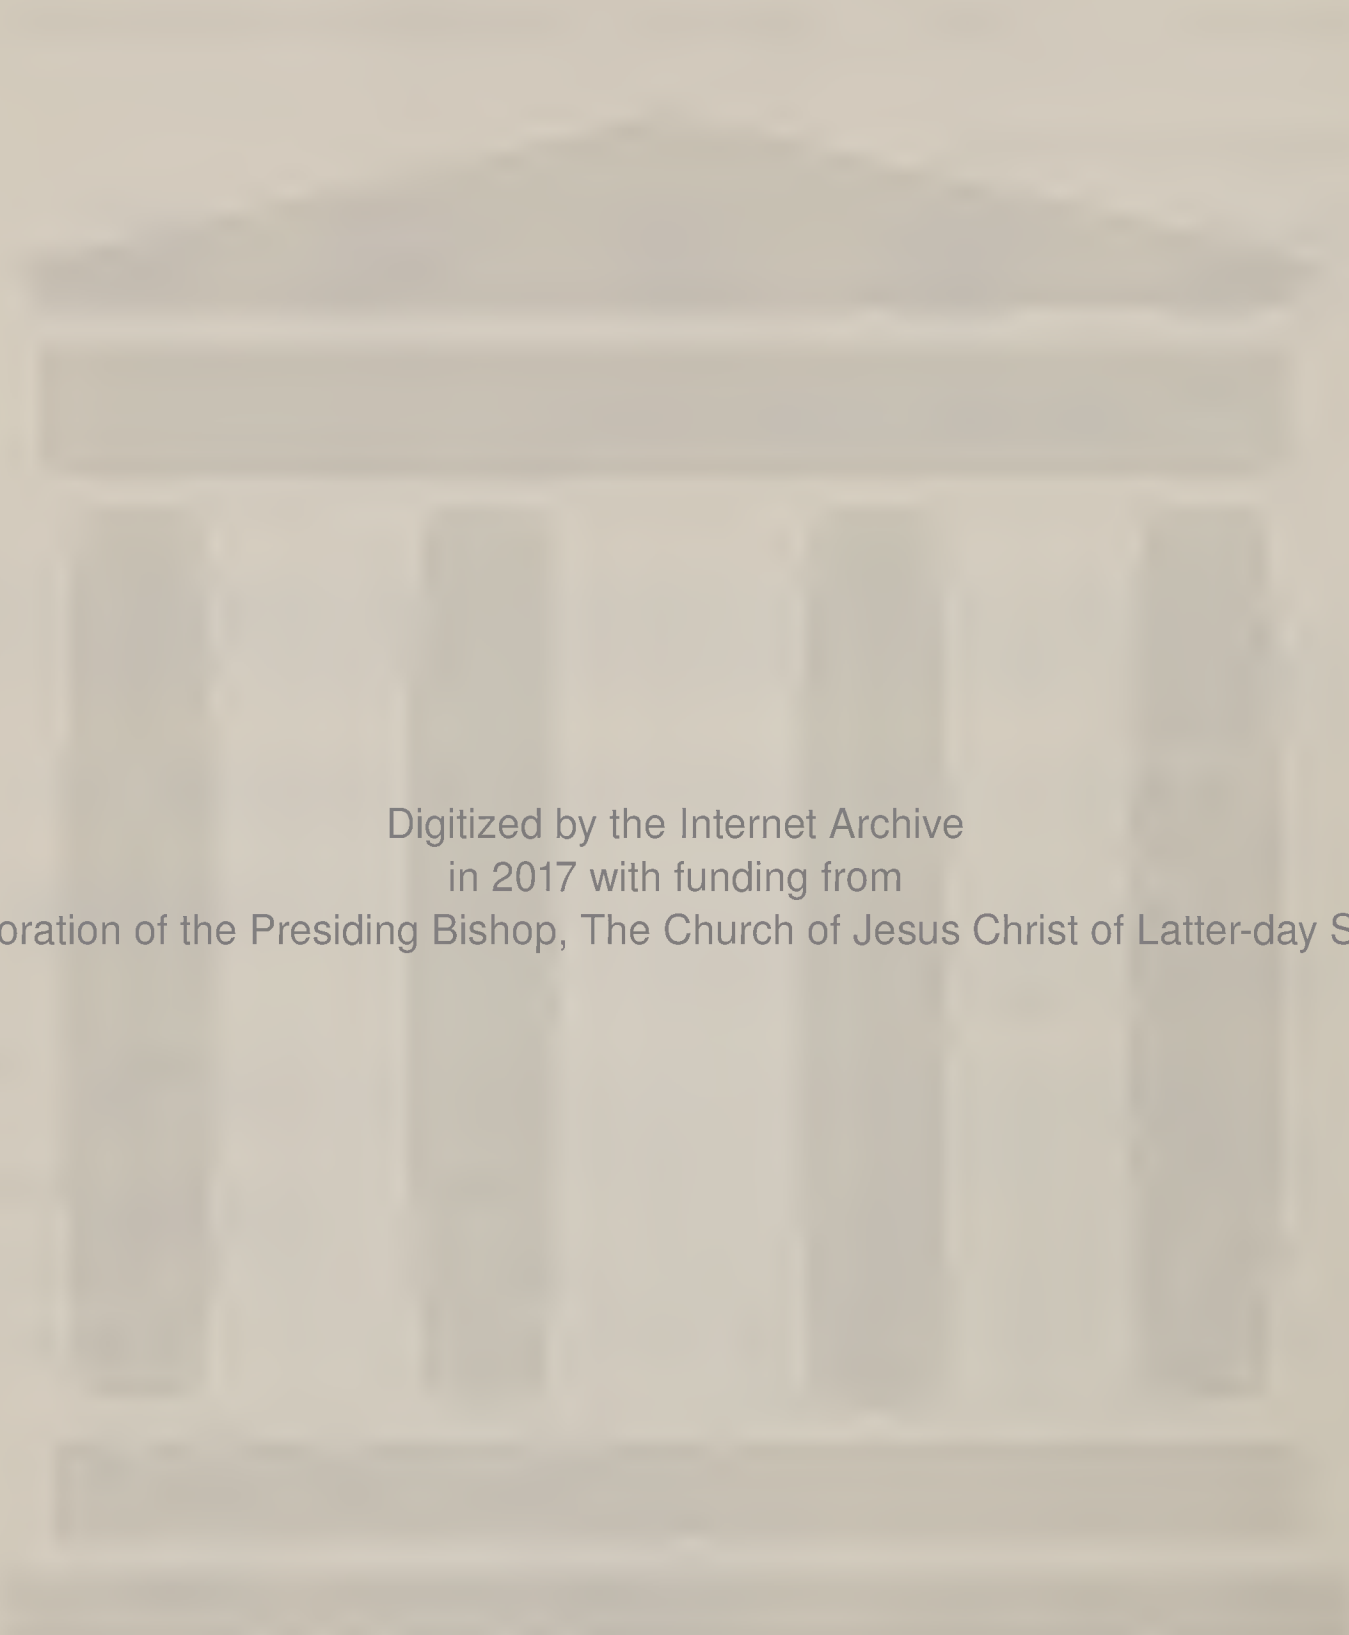

DATE MICROFICHED

7 May 1986

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the success of any business and for the protection of the interests of all parties involved. The author argues that without accurate records, it is impossible to make informed decisions or to identify areas for improvement.

2. The second part of the paper describes the various methods used to collect and analyze data. It outlines the steps involved in designing a study, selecting a sample, and collecting data. The author also discusses the importance of ensuring the reliability and validity of the data collected. Various statistical techniques are mentioned, including descriptive statistics, inferential statistics, and regression analysis.

3. The third part of the paper presents the results of the study. It includes a detailed description of the data collected and the analysis performed. The author discusses the findings of the study and their implications for the field. The paper concludes with a summary of the main points and a list of references.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

which are satisfied by the functions  $u(x, y, z)$  and  $v(x, y, z)$  in the domain  $G$  of the space  $E_3$  bounded by the surface  $S$ .

It is shown that the system of equations has a unique solution in the domain  $G$  if the functions  $u$  and  $v$  satisfy the boundary conditions
